### LeakBarrier® Fast90™ and PS200<sup>HT</sup> - Application Update

This bulletin revises Tarco's specification with respect to securing Fast90 and PS200<sup>HT</sup> self-adhering underlayments at the overlap areas using roofing nails. This technical bulletin is effective August 14, 2007.

Tarco requires the use of RING SHANK NAILS and TIN CAP FASTENERS when installing Fast90 and PS200<sup>HT</sup> at roof slopes equal to or greater than 5:12. **Fastening of sheet shall be in accordance with Tarco's published installation instructions or applicable Building Code.**

If LeakBarrier membrane published installation instructions and the above guidelines are not strictly followed, Tarco will not be responsible for the product performance.

If you have any questions or require additional information, please contact your local Tarco Sales Representative or Tarco Technical Services at (813) 484-8761.
