TECHNICAL BULLETIN

LB-07-08B-R1

PS200^{HT} - Application Update

This bulletin revises Tarco's specification with respect to back nailing LeakBarrier® PS200^{HT} self-adhering underlayments. This technical bulletin is effective **April 12, 2010**.

Tarco requires the back nailing of all its underlayments. The back nailing requirements include using minimum 11 gauge fasteners applied with a minimum 1" disk. When installing PS200^{HT} at roof slopes equal to or greater than 2:12, the fasteners and disks shall be fastened at a minimum rate of 9" o.c. Fastening of PS200^{HT} shall be in accordance with Tarco's published installation instructions or applicable building codes. Please refer to applicable building codes prior to installation.

If PS200^{HT} published installation instructions and the above guidelines are not strictly followed, Tarco will not be responsible for the product performance.

If you have any questions or require additional information, please contact your local Tarco Sales Representative or email Tarco Technical Services at technicalservice@tarcoroofing.com
